

AIMSELF

Music & Sound energy based autism intervention

Stage 1-Identification and Classification **6 MONTHS**

- Multi-faceted intervention catering to all the needs of an autistic individual
- Periodic observation by specialists
- **Core intervention : Sound energy management**
 - Based on elementary principles and ability of sound to rearrange a human body
 - **Helpful to re-tune an autistic individual to a more stable functioning**
 - **Reduce hyperactivity naturally**
 - Sound energy transmission to the nerves directly or indirectly
 - External scientific applications related with music therapy
 - Psychological Interventional therapy : using rhythm and harmony to shape a systematic mindset
 - Using classical performances, religious performances or existing systems already established
- **Sessions : 40 mins - 1 hr**
 - *One on one* sessions
 - Group sessions at a later stage to initiate social development
- Evaluation : Using *ATEC* (Autism Treatment Evaluation Checklist) :

Stage 2-Development of Individual capacity

Stage 3-Job placement, self sufficiency & 'savant skill' refinement
